## **PART IIA PERMIT APPLICATION INSTRUCTIONS FOR COMPLETING**

### PURPOSE:

To obtain the information needed to process applications for air permits and to maintain these permits. The information requested is used to determine whether a source must meet State and/or Federal Regulations and if the source is capable of achieving the applicable standards.

### EXPLANATION AND DEFINITION:

Any person who plans to construct, alter, or operate a source that emits air contaminants, including the installation of any device for the control of air contaminants shall first obtain a permit from the Department. Use Part IIA for a fuel burning operation which is defined as "use of furnace, boiler, device or mechanism used principally but not exclusively to burn any fuel for the purpose of indirect heating". Dryers, kilns, tenter frames, etc., are usually not considered fuel burning processes, but are usually considered processed (Part IIB application).

### Item By Item Instructions:

- Item 1.      Company Name for permit.  
Type of Fuel Burning Operation indicating whether steam boiler, dowtherm heater, hot gas heater, etc.  
Unit Designation indicating plant's designation (e.g., no. 2 steam boiler, etc.).
- Item 2.      Indicate manufacturer specifications.
- Item 3.      Fuel data indicating type and grade of fuel (e.g., no. 4 fuel oil, bituminous coal, etc.). For multiple fuels indicate whether primary (P), secondary (S), or in combination (C). For Consumption indicate in lbs, gallons or ft<sup>3</sup> per hour.
- Item 4.      Indicate burner type. The % reinjection means percent of fly ash that is collected and then reinjected as fuel.
- Item 5.      Description of control device equipment.
- Item 6.      Stack Data specifications.
- Item 7.      Emission rate data at rated capacity (lb/hr). For Method of Estimating Emissions indicate whether stack test, AP-42, material balance, engineering calculations, etc.
- Item 8.      Indicate if materials are regulated under the South Carolina Hazardous Waste Management Act or if any materials are suspected to be harmful to human health/welfare or plant/animal life.
- Item 9.      Indicate operating schedule including normal operation and seasonal variation.
- Item 10.     Indicate procedures that will be taken to dispose of waste material.

### OFFICE MECHANICS AND FILING:

In accordance with retention schedule HEC-AQC-3 break file at the end of each fiscal year, retain within the Agency for five additional years and then destroy.
